

INNOVATION: Birth of a Sky Scraper. Low Altitude Blimp Photography has extensive experience in producing Accurate, High Quality View Study Imagery. With the aid of our exclusive Blimp Photography Unit, we are able to carefully capture all of the information needed to help get your project off the ground.

VISION: Now things start to get interesting. 20' ABOVE GROUND, 2nd FLOOR. Working off of the set of preliminary drawings we receive, we carefully elevate our BPU to the specified level for each floor, & snap a 360° series of 8 photos per elevation.

PROGRESS: It's all becoming so much clearer. 100' ABOVE GROUND, 10TH FLOOR. As our elevation increases, we find exactly what our Client was hoping for - Visual Gold.

ENLIGHTENMENT: View things like never before. 200' ABOVE GROUND, 20TH FLOOR Even in this narrow, congested location, the BPU continues to operate flawlessly, with Zero Emissions, No Noise & virtually without impact on the surrounding environment. So, no matter what color Blimp you see us flying today, we hope you think of it as **Green**.

SUCCESS: See things above & beyond the ordinary. 320' ABOVE GROUND, 32nd FLOOR When we reach the top, we're greeted with a view that is both spectacular & breathtaking. The Client is more than pleased. And when our descent is complete & the BPU is put away, we are extremely proud to add one more day to our perfect safety record.
